Executive Summary & Value Proposition

- **The Mission:** Bridging the gap between high-potential academic talent and resource-constrained startups and small businesses through structured, deliverable-focused consulting.
- **Target Market:** Early-Stage Startups (Pre-Seed to Seed) needing market sizing, financial modeling, pitch decks, GTM strategy, or technical/data prototypes; and Small & Medium Businesses (SMBs) looking to digitize operations, analyze customer data, optimize supply chains, or launch D2C channels.
- **Unfair Advantage:** Analytical rigor at accessible cost; zero hourly billing anxiety via fixed-price deliverables; and dedicated focus since each consultant works on strictly 1 case at a time.

Business Model & Pricing Tiers

- **Revenue Model:** Fixed-price, deliverable-based revenue rather than hourly billing. Consultant count and case duration are case-dependent and locked in a Statement of Work (SOW) with the client before kickoff.
- **Tier 1 (Diagnostic & Research Sprint | 2-3 Weeks, 1-2 Consultants):** Market sizing (TAM/SAM/SOM), competitor matrix, customer discovery synthesis (15-20 interviews), and executive summary deck.
- **Tier 2 (Growth & Strategy Blueprint | 4-6 Weeks, 2-3 Consultants):** Everything in Tier 1 plus full GTM or pricing strategy, financial model/unit economics projection, and a 90-day implementation roadmap.
- **Tier 3 (End-to-End Execution & Build | 6-10 Weeks, 3-4 Consultants):** Everything in Tier 2 plus custom technical/data deliverables (analytics dashboard, ML/automation scripts, CRM setup) and bi-weekly implementation sprints with handover training.
- **Payment & Margins:** 50% upfront deposit upon SOW signature and 50% upon final sign-off. Revenue split of 70%-75% to executing student consultants and 25%-30% retained by the firm treasury.

Client Acquisition & Pipeline Engine

- **1. Ecosystem & Incubator Partnerships:** Partner with university incubators, entrepreneurship cells, startup accelerators, and campus VC funds to offer office hours or discounted Tier 1 sprints.
- **2. Value-First Outbound (Micro-Audit Playbook):** Send 20 seed startups or SMBs per month a tailored 1-page teardown or micro-audit and offer a 15-minute walkthrough.

- **3. Proof-of-Work & Content Flywheel:** Publish anonymized case studies after every engagement and share sector snapshots on LinkedIn.
- **4. Retainer & Referral Loops:** Upsell Tier 1 clients into Tier 2/3 execution, and offer a 10% referral discount or free diagnostic add-on to existing clients.

Delivery & Talent Operations

- **The 1-Case-Per-Consultant Rule:** At any given time, a consultant can only work on 1 case to protect academic balance and deep focus.
- **Elastic Bench Model (Freelance Scaling):** When firm demand exceeds core capacity, we hire pre-vetted student consultants on a freelance basis from a 20-30 person talent bench across strategy, finance, data/ML, software, and growth.
- **Case Staffing & QA:** Team size (1-4 consultants) and duration (2-10 weeks) are decided jointly with the client. Every deliverable undergoes a 48-hour internal partner review before client handoff.
