THE DELHIVERY CASE COMPETITION

DELHIVERY | Strategic Moat | GTM & Marketing | Product & Innovation | Operational Synergy | Roadmap & Scale

Activate the Consumer Layer » Win the Agility Gap » SMB-First Growth Engine » Asset-Reuse Scale Model » Demand Flywheel via Trust Rails » Path to Platform Dominance

TYPICAL DELIVERY SOLUTIONS

PHYSICAL VISIT
Customer must visit a physical branch during working hours to initiate a shipment

MANUAL PROCESS
Pricing, paperwork, and service details are discovered manually at the counter.

LIMITED VISIBILITY
Pickup and delivery are scheduled reactively with minimal real-time tracking.

FRAGMENTED FLOW
Multiple handoffs with no single system owning the end-to-end journey.

VALUE PROPOSITION

LIVE VISIBILITY
Track your parcel in real time from pickup to delivery, with no follow-ups or guesswork.

NATIONWIDE ACCESS
Reliable doorstep delivery anywhere in India, backed by a network that has already handled 2B+ parcels across ~18.6k PIN codes.

ZERO FRICTION
Book, schedule pickup, and ship without paperwork, branch visits, or process confusion.

PREDICTABLE DELIVERY
Know when your parcel will arrive through accurate ETAs, proactive alerts, and clear resolution if things change.

Delhivery digitizes the entire value chain to turn these bottlenecks into an invisible, automated advantage.

COMPETITIVE LANDSCAPE

Incumbents deploy technology primarily to support internal operations, but the consumer journey remains anchored to physical branches. Delhivery applies technology at the system level, removing physical dependencies and delivering a fully from-home, end-to-end C2C experience.

PLATFORM VS FRANCHISE
Centralized "single brain" for end-to-end efficiency vs. fragmented, profit-clashing local silos.

OWNERSHIP
Algorithm-driven "System of Record" eliminates the manual handoffs and paperwork of legacy models.

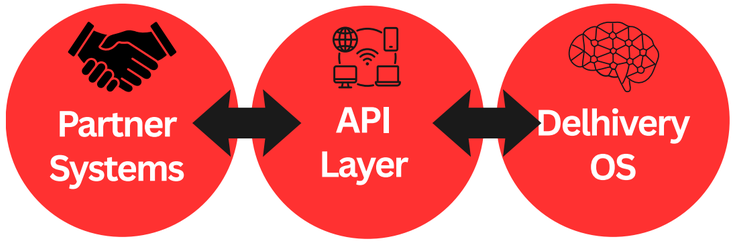

INFRASTRUCTURE
Automated sorting handles high-variance C2C loads profitably, even in remote, long-tail PIN codes.

FLYWHEEL
Volume-fed AI creates a self-improving loop; as shipments grow, network accuracy and speed increase.

Delhivery scales through intelligence, not just labor - turning every parcel into a data-driven competitive moat.

DELHIVERY acts as an OPERATING SYSTEM FOR LOGISTICS

Core logistics functions are decomposed into discrete system components with clearly defined boundaries and responsibilities, allowing each part of the Delhivery OS to operate independently yet coherently.

Shipping can be embedded inside a partner's product or workflow instead of being handled as a separate operational process.

Shifting logistics from physical dependence to system-level intelligence.

THE "WHO"

The 'Instapreneur'
15M+ Social Sellers

NEED
Professionalism & Bulk booking for WhatsApp/IG orders.

THE DELHIVERY FIX
Instant API integration and label-less bulk pickups.

The Migrant Professional
45% of Urban Workforce

NEED
Secure document/personal item shipping to Tier 2/3 cities.

THE DELHIVERY FIX
OTP-verified "Secure-Ship" and 100% Home Pickup.

Festive & Gifting
3x Vol. Spike (Oct-Jan)

NEED
International reach for NRIs and "Delightful" unboxing.

THE DELHIVERY FIX
FedEx-backed International Express and festive packaging.

- BTL conversion

THE TOUCHPOINT
B2C "Surface Awareness"
Dynamic QR placement on 2.9M daily parcels.

THE ACTION
Zero-Friction Scan
Instant redirection to Delhivery C2C portal - No search required.

THE HOOK
The "First-Ship" Incentive
₹50 Direct Credits applied to the first home-pickup booking.

2.9 M
Daily Touchpoints - Converting every B2C delivery into a zero-CAC engine.

ATL awareness

DELHIVERY : " DOORSTEP TO ANYWHERE"

- Eliminating the "Time-Tax" by focusing on the Zero-Travel value proposition.
- Channels: Prime-time TV slots during IPL/Festivals and localized Meta/YouTube Ad-targeting.

Target 65%+ Brand Recall in Tier 1 & 2 cities via high-impact festive reach.

Deep-Link API
Residents book directly via their society app. No new app download required for the first-mile.

Scale
Active in 50,000+ Premium Societies. Automating first-mile requests at the source.

Express Density
"Express Vans" stationed within a 2km radius of partner clusters.

<30 Minutes

99.5% Urban Accessibility

Achieved through hyper-local positioning of Express Vans, reducing first-mile 'dead-miles' by 40%.

Competitive Landscape: The Tech-Utility Moat

AXIS	DELHIVERY	BLUE DART
Pincode Reach	●●●●●	●●●●○
Tech Transparency	●●●●●	●●●○○
Operational Ease	●●●●●	●●●○○
Cost Efficiency	●●●●●	●●○○○

The Entry Point
"First-shipment 50% Discount" to lower the barrier for new C2C users.

The Multiplier
Credits for Social Sellers who refer their network, turning power-users into a growth engine.

The Bedrock
Default shipping partner for ONDC, capturing small merchants at the source.

99.5% population reach **Zero-friction user experience.**

Transforming India's largest B2B backbone into a household C2C utility through Zero-Friction shipping

Objectives (What Success looks like)

ADOPTION
Downloads → active users (30% 6-month MAU/installer target for initial metros)

RETENTION
30-day retention ≥ 25% for SMB users

DELIVERY SLA
On-time delivery rate ≥ 95% for metro; NDR (failed delivery) rate ≤ 4%

CUSTOMER EXPERIENCE
NPS ≥ 40 for senders and ≥ 45 for receivers in 12 months

BY 2026
Delhivery is set to dominate with
₹11,000 Cr+ in revenue
18% EBITDA

Monetization & commercial model

- Pricing tiers: Standard vs Express vs Same-Day vs Sub-2-hour (premium).
- Add-ons: Insurance, packaging, pickup-at-door, scheduled delivery.
- SMB subscriptions: Monthly volume-based plans with API access.
- Cross-sell: Use enterprise relationships to onboard employee-booking programs.

Customer Journeys

Sender (individual / SMB)

- Discover & price: needs instant, transparent pricing, zone-based or weight-based, with volume discounts for SMBs.
- Book & pickup: schedule pickup windows, self-serve label printing or pickup without packaging assistance.
- Track & claims: end-to-end status, ETA updates, ePOD, automated refunds/claims.

Receiver (recipient)

- Receive notification: multi-channel ETA (SMS/WhatsApp/push) + secure OTP
- Manage delivery: allow time-slot selection, reschedule, or neighbor/pickup point options.
- Proof & returns: photo ePOD, instant returns pickup initiation, simplified dispute resolution

PLATFORM OS STACK
Ecosystem → ONDC | Social | Global
Intelligence → AI Routing | Dynamic Pricing | OS1
Execution → Sort Centers | Fleet | 19.2K PIN

MISSION 2026 EDGE
Reliability → 98.5% SLA | AI Dispatch Precision
Intelligence → 30B+ Data Signals | Routing + Demand
Efficiency → 3× Asset Turns | Infra-Led Scale

NEXT FRONTIER
Urban Speed → Dark Stores | Sub-2 hr Fulfillment
Network Reach → Drone Logistics | Long-tail PINs
Green Ops → 66% EV Fleet | Sustainable Last-mile

How to leverage Delhivery's existing assets

Network & Pin-code Coverage
Use Delhivery's extensive network to offer a single trusted provider across 18k+ pin codes — highlight as trust & reach advantage

Warehousing & PTL Backbone
Use micro-fulfillment or cross-docking hubs to accelerate intracity pickup-to-delivery flows (reduce in-transit time using PTL lanes).

Existing Fleet & Partner Couriers
Integrate app booking into existing dispatch/manifest system to reduce marginal cost of new consumer bookings.

COD Reconciliation
Streamline settlement leveraging existing settlement pipelines to offer faster merchant payouts (value proposition for SMBs).

Brand & Enterprise Clients
Cross-sell app to enterprise customers (allow employees to book personal shipments at negotiated rates).

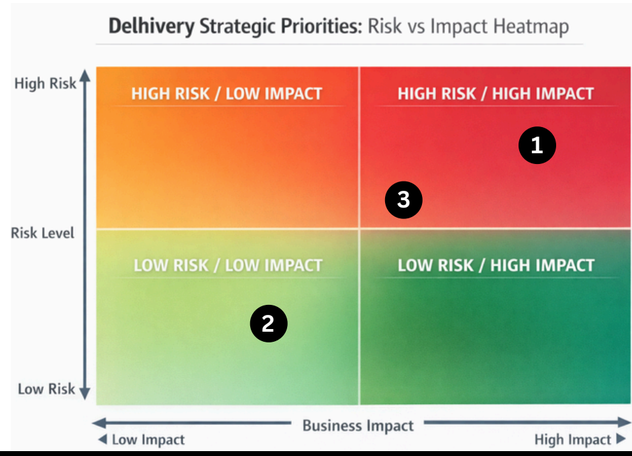

Data from B2B operations
Use historical routing and delivery failure data to tune predictive ETA, address verification and reduce NDRs.

Risks & mitigations

HIGH CAC FOR CONSUMER USERS
SMB-First Acquisition
Partnerships + referrals → low CAC, high LTV

COD MONEYFLOW RISK & FRAUD
Digital Payments & Trust
UPI/Card, fast reconciliation, seller KYC

OPERATIONAL STRAIN & FAILED SLAs AT SCALE
Controlled Metro Rollout
Pilot cities + dynamic capacity gating

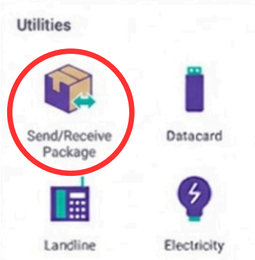

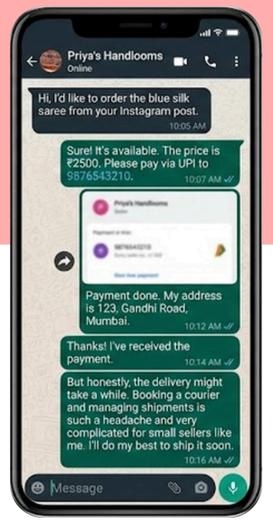

By layering product, intelligence, and partnerships on Delhivery's existing network, we transform logistics from a cost center into a scalable growth engine.

OBJECTIVE OF PARTNERSHIPS

reduce trust deficit | lower distribution & CAC | drive behavior shift from offline courier stores to app-based shipping

PARTNERSHIPS	UPI Apps & digital payment platforms	Social Selling Platforms	Local Stores as Assisted Digital Partners
Why	UPI apps already have daily active users (**450 million in India**) across Tier 1, 2, and 3, **strong trust** for payments, and deep penetration among small sellers and individuals.	India has **millions** of micro-entrepreneurs selling via: WhatsApp, Instagram, FB. **Their biggest pain is logistics** complexity, not marketing.	India is still assisted-digital, especially for logistics like packaging help, address writing, and trust in physical touchpoints. *Instead of competing with courier franchises, Delhivery partners with them.*
Partnership model	1. Integrated as a mini-service **inside UPI apps** 2. Send money → Ship parcel →**Track delivery**	1. Logistics-as-a-native-feature for sellers 2. **Direct shipment booking from chat/dashboard**	1. **Local stores onboarded as Delhivery Assisted Points** 2. Store staff uses Delhivery App on behalf of customers 3. **Revenue share per shipment**
What Delhivery gains	1. **Instant reach without heavy ATL spends** 2. Lower CAC through revenue-share model 3. **Faster adoption among first-time users**	1. **High-frequency repeat users** 2. **Predictable shipment volumes** 3. Natural upsell to MSME logistics later	1. **Last-mile trust in Tier 2 and 3** 2. **No capex** on owned stores 3. Faster penetration where digital adoption is low

OPERATIONAL & ECOSYSTEM SYNERGIES

Shared Network Synergy
App shipments ride on existing B2B line-haul and last-mile routes

higher asset utilization and lower per-parcel cost

Tech Stack Reuse
Unified tracking, pricing, routing, and NDR resolution across B2B and App

enterprise-grade reliability for consumers

Pickup Density Flywheel
Assisted stores + social sellers + UP demand increase local pickup dens

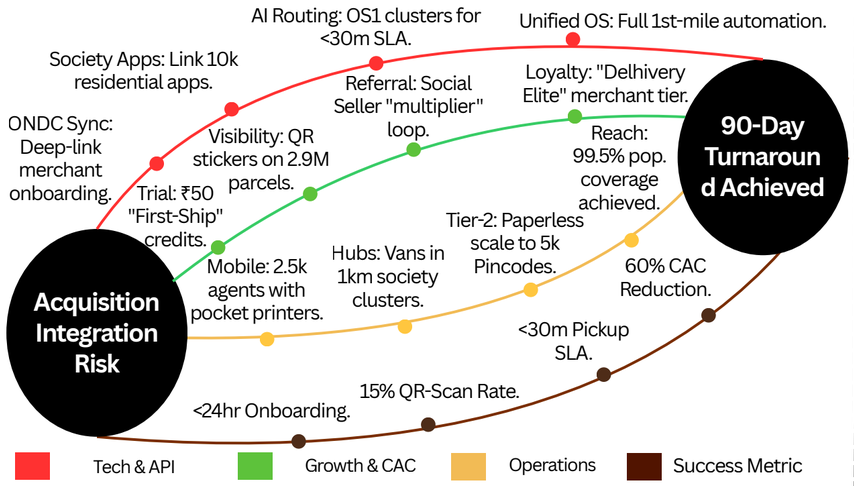

faster deliveries, lower SLA risk

20 %
Reduction in last mile cost

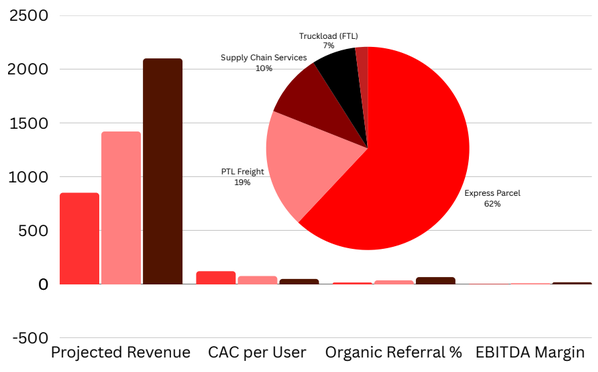

18,000+
PINCODES REACHED

Scaling a high-density logistics network through India's digital and physical rails with zero incremental Capex, unlocking Tier 2+ penetration by digitizing the trust of local stores and the reach of UPI platforms.

60 - 90 DAYS ACTION PLAN

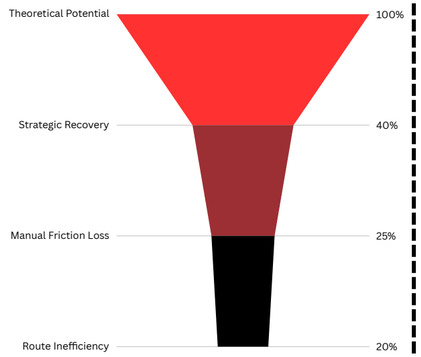

The "Scale Metric"

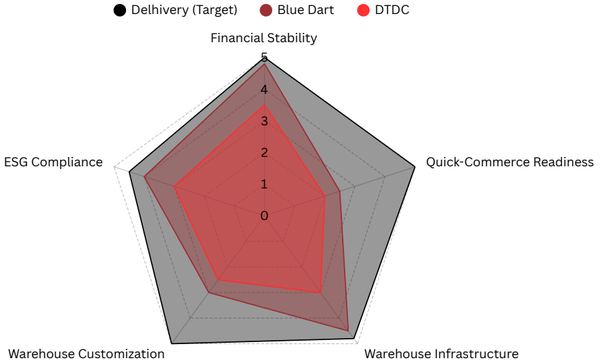

Delhivery's integrated platform converts scale, data, and 99.5% national reach into a high-margin Commerce OS, targeting 18% EBITDA with a ₹2,100 Cr+ consumer layer.

The "Value Unlock"

Our 90-day plan plugs the 'operational leaks' that currently drain 45% of competitor margins.

Future-State Benchmarking

Delhivery's roadmap secures a tech-first moat in high-margin sectors, achieving 2x the Quick-Commerce readiness of legacy peers to dominate the future of flexible retail.

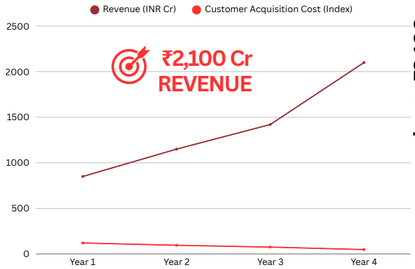

DELHIVERY
4 YEAR STRATEGIC VISION & ROADMAP

ONDC BACKBONE
Deep-integration as the default logistics layer for 10M+ ONDC merchants.

PREDICTIVE DENSITY
AI-led route clustering to reduce "Dead-Miles" by 30% nationwide.

99.5% REACH
Scaling hyper-local nodes to cover 18,700+ Pincodes across Tier 2/3.

60% CAC REDUCTION ACHIEVED

Consumer app scales to ₹2,100 Cr layer within Delhivery's ₹11,000 Cr+ platform.

Phase 1: Foundational Build (Year 1)

Phase 2: Hyper-Growth (Year 2-3)

Phase 3: India's Commerce OS (Year 4+)

OS1 INTEGRATION
100% transition to paperless, label-less pickups via OS1 mobile app.

QR ACIQUISITION
Launching first-mile loop via QR stickers on 2.9M daily B2C parcels.

SLA DOMINANCE
Achieving <30 min pickup SLAs in Metros via 2km van clusters

FLIP TO POSITIVE EBITDA -> +2%

PLATVERY LAUNCH
Exporting Delhivery's tech stack as "Platform-as-a-Service" for global markets.

CROSS BORDER SCALE
Dominating the Social Seller export market via seamless C2C logistics.

FIANCIAL MATURITY
Stabilizing at 18% EBITDA with ₹2,100 Cr+ annual revenue.

UNDISPUTED MARKET DOMINANCE

FINANCIAL EXIT VELOCITY

THE GROWTH ENGINE
60% CAC Reduction
₹120 → ₹48 per user
2.9M daily B2C parcel stickers + Organic referral loops.

THE SERVICE MOAT
<30 Min Pickup SLA
Achieving "Express" parity in Metros.
Hyper-local 2km-radius van clustering & OS1 dispatch.

THE FINANCIAL GOAL
18% EBITDA Margin
₹2,100 Cr Revenue Powerhouse.
High network density and 99.5% population reach.

Delhivery 2026: Evolving from a delivery network into the indispensable operating system for Indian commerce.

THANK YOU
